

Networks Sub-module Assignment

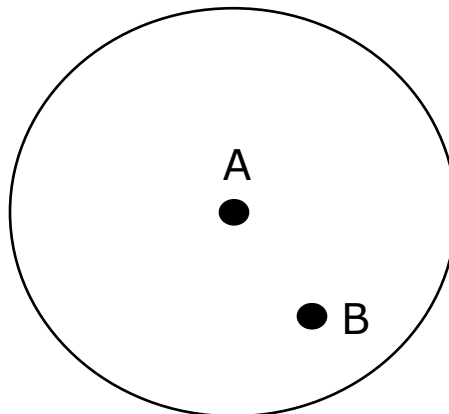

Answers for Part 2

Your name

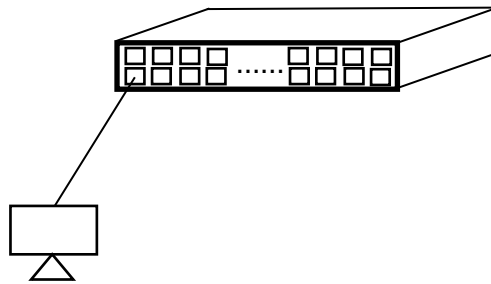

Your ID

1. Sketch a topology to accurately reflect the connections of the network described above. Your topology should include all devices mentioned and their connections.

[Below is an example of wireless topology where B is in the coverage of A and the area within the circle is the coverage of A. Note it is not an answer. Use your answer to replace the topology. You do not include the sentences in these square brackets in your final submission.]

[Below is an example of wired topology with a switch and a PC. Note it is not an answer. Use your answer to replace the topology. You do not include the sentences in these square brackets in your final submission.]

2. Which wireless user devices above can receive the frame sent by C? Why?

The wireless user device *** can receive the frame sent by C. This is because
